

SHL AB

IPv6 BGP config for "small" ISP

Leo De Geer

TR0003

Consultant/Trainer

Objective

- To get our RIPE assigned IPv6 running
- OSPFv3 internal ROS7.14
- BGP in ROS 7.14

Think FIRST!

- Resource Certification at RIPE
- Route Origin Authorisations (ROAs)
- Route Object

Let's do it live

- This is done to my core router in Sweden over L2TP ipsec not to transit
