

# Building one of the fastest global DNS Anycast network in the world

The Content & Malware Filter for MikroTik

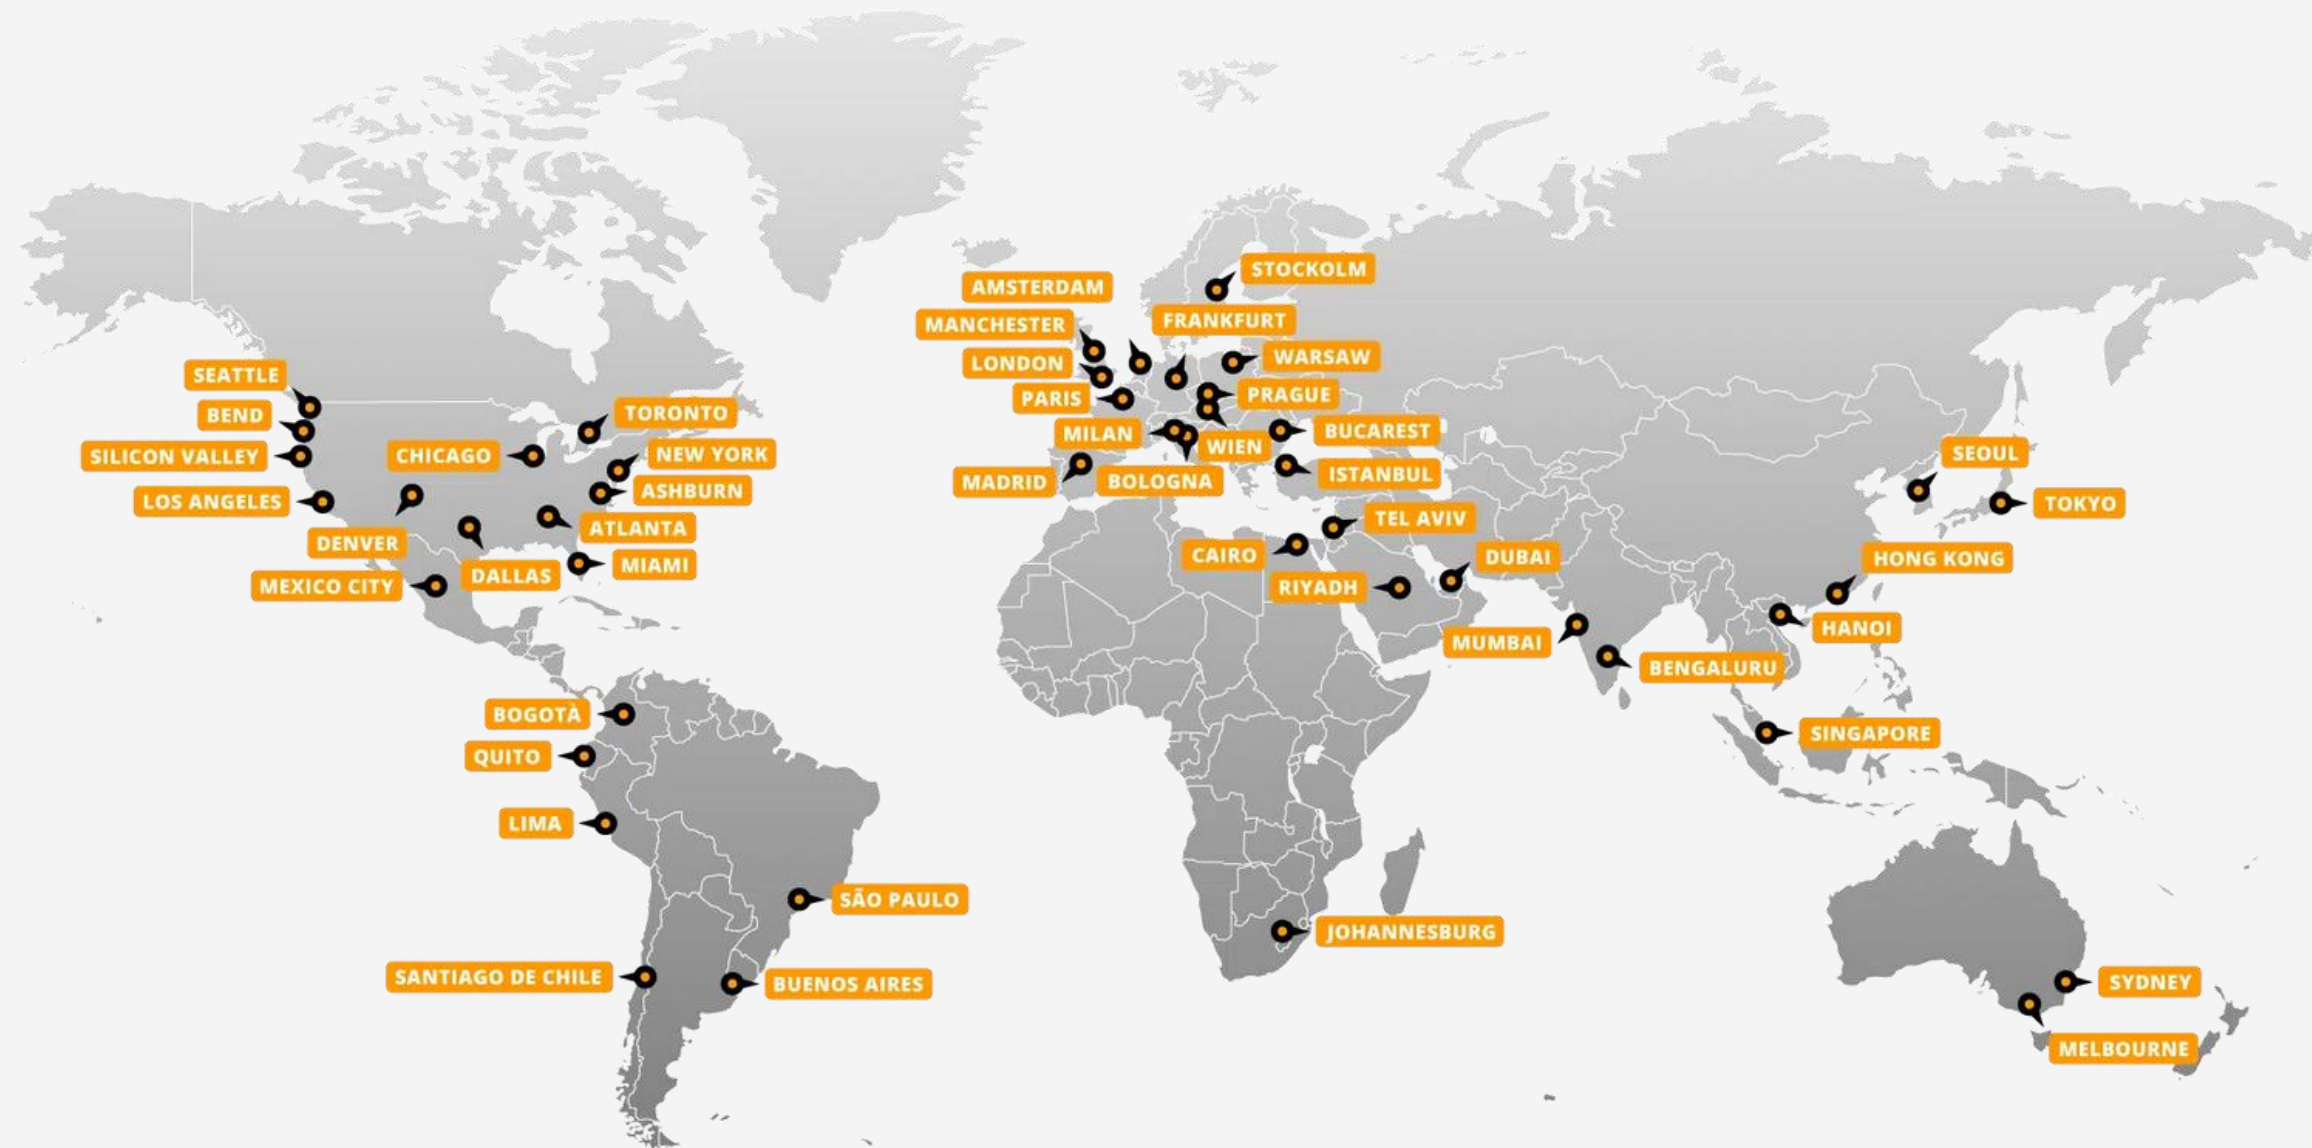

# About us

**To enhance internet safety by providing cutting-edge cybersecurity solutions through MSPs.**

A long journey towards global security? A journey that began with SMEs and schools and has now reached global distribution in 156 countries.?

The vision of our company is to ensure the security of users before any economic ?aspect and, to do this, we rely on a selected and constantly growing network of ?strategic partners who can guarantee the best on-site intervention for any need.

# Global datacenters

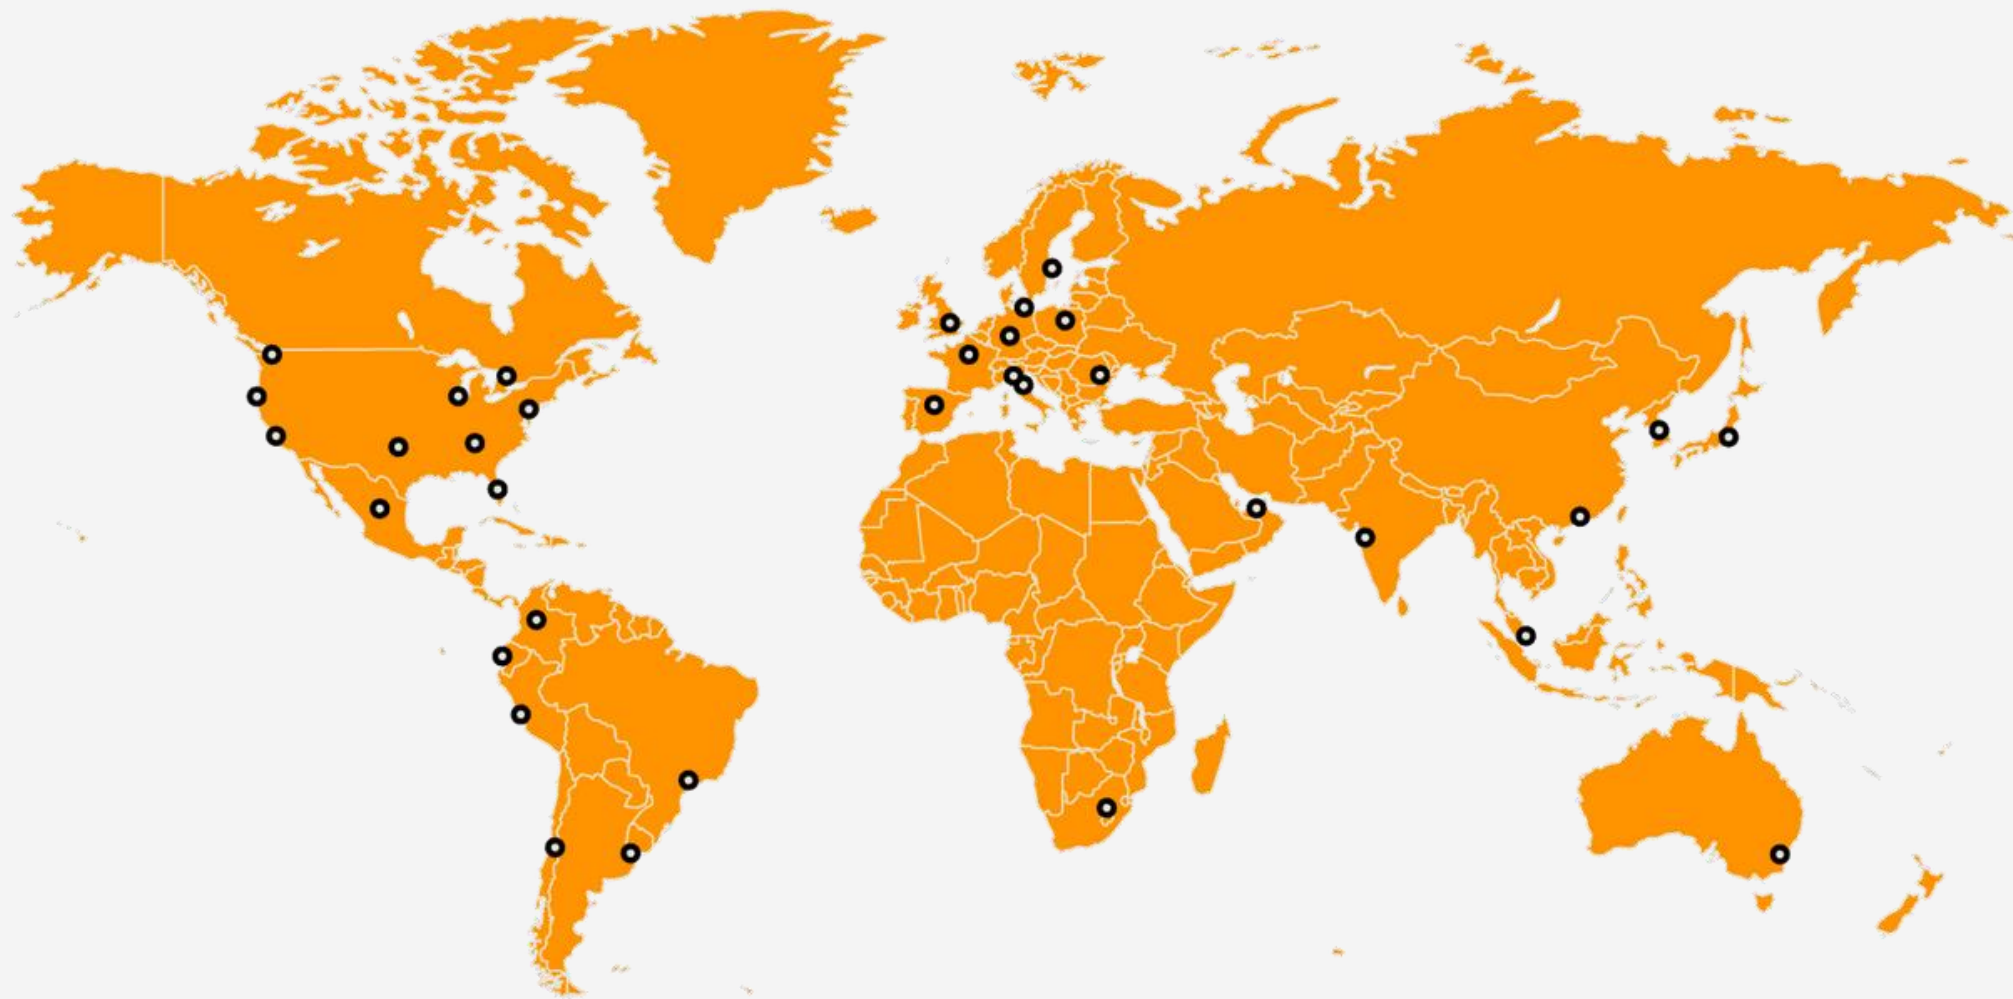

# Global anycast network

FlashStart emphasizes security and the choice to deploy its services on a top-notch **Anycast network**.

Anycast is a network technique that guarantees high service availability, such as fault-tolerance and backup routes.

It guarantees an **Up time 99.62%** on average (source: Dnsperf.com) and very low latency in response, 24×7 monitoring of the platform and **carriers with very high Tier-1 reliability**.

# Strong points

**Global protection** via  
**Anycast network**

Unique features  
(**Geo-Blocking**)

**Advantageous** prices

# Malware protection

*«42% of computers are vulnerable to malware.»*

FlashStart is the optimal DNS tool which prevents access to sources of danger on the web:

- » + than **1 million** malware are blocked every day.
- » + than **190 million** sites already surveyed.
- » **Blocking capabilities** for new domains deemed dangerous.
- » **Updating** lists of suspicious and dangerous domains in real time.
- » **International alliances**: exchange of infected and dangerous domains with international authorities.

# Content filtering

FlashStart is the **ideal solution** for **filtering content** in a professional manner:

» **AI continuously scans** the web and the new domains, classifying them into more than 200 categories;

» **prevents access:**

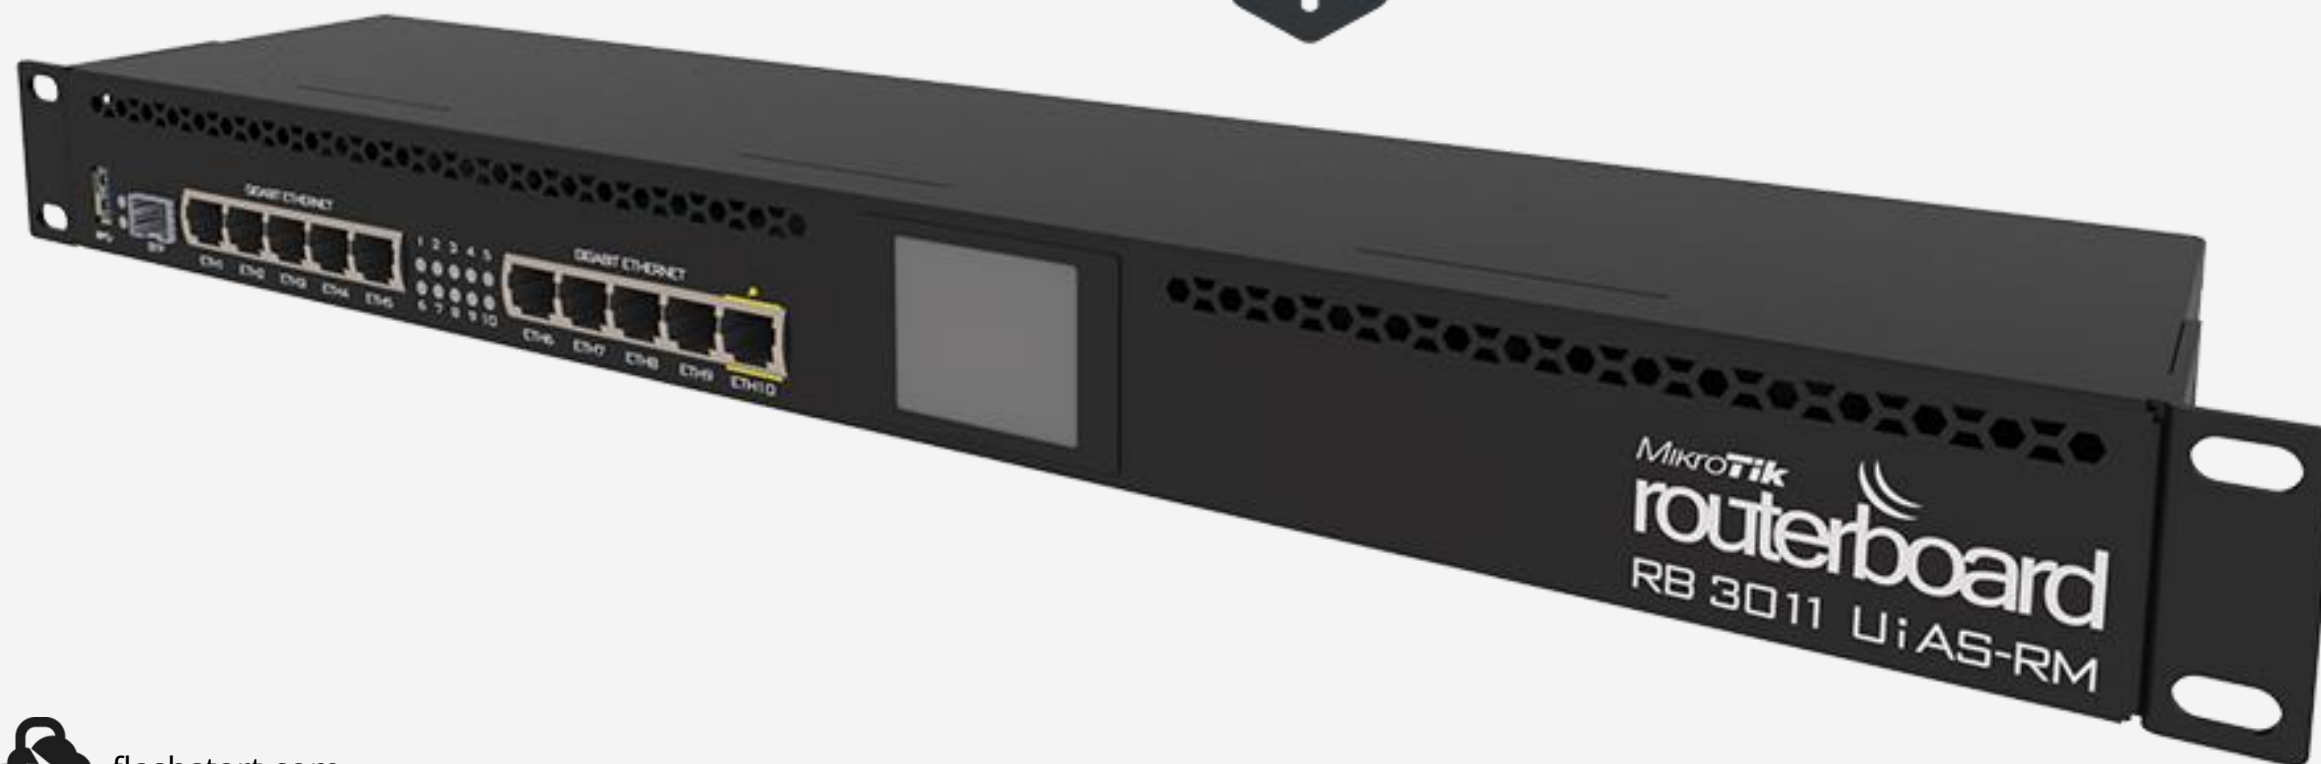

- social media
- online advertising
- adult sites
- gambling

» **filters** by time slot, user types or groups.

It offers an **easily configurable cloud-based platform**, customizable and **centrally manageable** for the entire network, without having to **continuously intervene with updates on individual devices**.

# Content & Malware filter for MikroTik

FlashStart has been certified as a “Made for Mikrotik” software platform.  
It guarantees an official acknowledgment and a full compatibility on any Router model and OS version!

# The best solution for filtering malicious contents for MikroTik RouterOS

FlashStart is the **innovative content** and **malware filter** for **MikroTik RouterOS devices**. It requires no additional hardware or software and does not perceptibly impact Router performance. It works as a cloud and inspects all DNS resolutions, and it filters internet access according to the end user's defined security policy.

FlashStart is a high quality, fast and easy-to-use solution which is designed to be sold by the MikroTik retailers community worldwide, becoming a 'Made for Mikrotik' with great determination.

**Hundreds of Mikrotik's retailers and distributors are successfully using FlashStart to increase the value of their RouterOS installation, to directly compete against the more expensive UTM and Firewall.**

# The fastest DNS in the world!

FlashStart is a high quality, fast and easy-FlashStart is the **fastest secure DNS in the world!** This is confirmed by [DNSPerf.com](https://dnspdf.com), the most authoritative independent benchmark, which tests secure DNS from 400+ locations around the world every minute. This achievement sees FlashStart surpass major competitors such as CloudFlare, DNSFilter and Cisco Umbrella, establishing itself as a global technology excellence.

# Thank you!
